Danny Jager

Front-end developer with professional experience in e-commerce and headless CMS environments. Completed a government-funded front-end development programme in the Netherlands and transitioned into a role within a full in-house development team. Experienced with Magento 2, Prismic, Vue.js, and Tailwind CSS, with a strong focus on reusable, component-driven architectures and cross-functional collaboration. Highly motivated and detail-oriented, seeking to continue growing within a UK-based development team.

Work experience

Front-end developer	Jan 2024 - Oct 2025
<i>CanvasCompany.nl B.V., Kollum</i>	

- Responsibilities**
- Developed and extended front-end functionality for an existing Magento 2 ecosystem of 20+ websites, contributing to the rollout of additional sites.
 - Helped design and implement a shared default theme/template used across all Magento 2 websites.
 - Built configurable options within Magento 2 allowing Marketing to manage brand-specific settings such as color schemes, feature toggles, and email templates.
 - Created a wide range of reusable PrismicIO slices and custom types for Marketing and Sales to independently build and manage page layouts.
 - Translated Figma designs into responsive, maintainable front-end implementations using PHTML, Tailwind CSS, XML, and Alpine.js.
 - Collaborated cross-functionally to scope features, assess technical feasibility, and improve internal workflows.

- Key Achievements**
- Significantly reduced developer workload by empowering non-technical teams to manage content, layouts, and configuration through Magento 2 and PrismicIO.
 - Established a scalable front-end architecture that supported consistent branding across multiple international websites.
 - Improved development efficiency by standardizing layouts and components across the Magento 2 platform.

- Additional Experience**
- Gained limited hands-on experience maintaining and implementing small front-end features in Magento 1.

Mobile Patrol Officer	Jan 2020 - Dec 2022
<i>Trigion, Friesland</i>	

- Responsible for proactive surveillance across multiple locations
- Conducted regular patrols and responded effectively to potential security risks
- Coordinated with appropriate emergency services when required
- Maintained a safe and secure environment with a strong focus on integrity and professionalism
- Prepared accurate and detailed incident and activity reports
- Demonstrated flexibility by working both afternoon and night shifts
- Strengthened the ability to work independently, make quick decisions, and adapt to changing situations, both independently and as part of a team

Site Security Officer

Jan 2017 - Jan 2020

Trigion, Friesland

- Managed access control across multiple locations, including identity verification and authorization procedures
- Conducted indoor and outdoor patrols to ensure the safety and security of premises
- Responded effectively to emergencies and security incidents in accordance with established protocols
- Prepared accurate and detailed reports following incidents and daily activities
- Worked at various COA (Central Agency for the Reception of Asylum Seekers) locations, covering both day and night shifts
- Developed strong intercultural communication skills by working with people from diverse cultural backgrounds
- Provided first aid and coordinated with emergency and medical services when required
- Successfully de-escalated high-pressure situations while maintaining a calm and professional approach
- Strengthened social and communication skills, teamwork, empathy, and customer focus
- Demonstrated the ability to work independently, remain stress-resistant, and act with a high level of integrity

Education

Front-end developer

Apr 2023 - Jan 2024

Hacklab, Leeuwarden

- Intensive front-end development programme funded by the Dutch government
- HTML, CSS, JavaScript and responsive web development
- Translating design concepts into accessible, user-friendly websites
- Building interactive web applications using modern frameworks
- UX principles, usability, and design fundamentals
- Portfolio development and job-readiness preparation

Security

Jan 2015 - Oct 2015

ROC Friese Poort, Leeuwarden

- Completed a comprehensive vocational training in security, gaining in-depth knowledge of security protocols and best practices
- Acquired practical experience during a 10-week internship at BCC in Leeuwarden
- Actively applied security procedures in a real-world retail environment
- Assisted in detaining suspects involved in theft and safely transferred them to the police
- Earned official security certifications
